

This CD contains the results of the Lake Winnipeg Science Workshop (LWSW) held November 29–30, 2004 at the Freshwater Institute in Winnipeg, Manitoba. The primary goal of the workshop was:

To identify science priorities and research needs for Water Quality and Nutrients, Fish Communities and Fish Habitat in Lake Winnipeg in support of current and emerging management issues as identified by the agencies directly responsible for the Lake's aquatic resources.

The workshop was organized by the Department of Water Stewardship, the Department of Fisheries and Oceans and Environment Canada. Participation included, amongst others, individuals from federal and provincial departments, Manitoba Hydro, City of Winnipeg, University of Manitoba, Lake Winnipeg Research Consortium, First Nations, and Canadian and US members of the Ecosystem Health Committee of the International Joint Commission's International Red River Board.

The other file on this CD is an Adobe Acrobat file. It is an electronic version of the following publication:

Ayles, G.B. and D.M. Rosenberg (editors). 2005. Lake Winnipeg Science Workshop, November 29-30, 2004. Can. Manuscr. Rep. Fish. Aquat. Sci. 2732: xii + 123 p.

Two appendices, VII. Keynote Presentations and VIII. Breakout Presentations, are not found in the paper copy of the report and are only found on this CD. The CD also includes some historical pictures of Lake Winnipeg fisheries.

Links to the important sections of the report are included in the Table of Contents on page iii (pg. 5 of the document) and in Table of Contents for Appendices VII and VIII on page 123 (pg. 137 of the document).
