

A STUDY OF
THE RELATION OF CERTAIN MAJOR AND MINOR ELEMENTS
TO THE PROBLEM OF SEED SETTING IN ALFALFA

by

Sidney Joshua Buckwold

A Thesis

Submitted to the Committee on Graduate Studies
in Partial Fulfilment of the Requirements
for the Degree of
MASTER OF SCIENCE

THE UNIVERSITY OF MANITOBA
LIBRARY

THE UNIVERSITY OF MANITOBA

TABLE OF CONTENTS

Page

1 Acknowledgments 1

2 Introduction 2

3 Review of Literature 3

5 I. Major Elements 5

6 II. Minor Elements 6

7 Calcium 7

8 Sulphur 8

12 Boron 12

14 Manganese 14

14 Zinc 14

14 Copper 14

15 Molybdenum 15

15 Sodium and Chlorine 15

16 Iodine 16

16 Titanium 16

16 Phallium 16

16 Radioactive Elements 16

17 "A-Z" Solution 17

17 III. Burning 17

18 IV. Summary 18

20 Experimental Procedure and Results 20

23 I. The University Farm 23

23 Methods 23

23 (a) Experimental Field A 23

24 (b) Experimental Field B 24

25 (c) Experimental Field C

26 Results

35 II. Arbors

35 Methods

36 Results

36 III. Benito

36 Methods

37 Results

37 IV. South Junction

39 Agronomic Investigations

39 (a) Methods

41 (b) Results

57 Analyses of Plant Material and Seed ..

57 (a) Methods

58 (b) Results

67 Summary and Conclusions

69 Appendix

69 Methods of Soil Analysis

69 (a) Water-soluble Sulphate

69 (b) Total Sulphur

71 Literature Cited

LIST OF ILLUSTRATIONS

| <u>Figure</u> | | <u>Page</u> |
|---------------|--|-------------|
| 1 | Graph showing effect of soil treatments upon average yields of alfalfa seed at South Junction, Man. | 45 |
| 2 | Square yard samples of alfalfa plants (early bloom stage) from plots at South Junction receiving the following treatments: 1) no treatment; 2) potassium sulphate; 3) potassium chloride; 4) calcium sulphate. | 53 |
| 3 | Square yard samples of mature alfalfa plants from plots at South Junction treated with the following: no treatment, gypsum (calcium sulphate), potassium chloride, and potassium sulphate. | 54 |
| 4 | Square yard samples of alfalfa plants from the experimental plots at South Junction. | 55 |
| 5 | A close-up view of the alfalfa plants in Figure 4. | 56 |

LIST OF TABLES

| <u>Number</u> | <u>Title</u> | <u>Page</u> |
|---------------|---|-------------|
| 1 | Total sulphur and water-soluble sulphate and reactions of soil from the experimental field at South Junction. | 21 |
| 2 | Total sulphur and water-soluble sulphate content and reaction of soil at the University (Experimental Field B). | 22 |
| 3 | Average yields of alfalfa seed at the University (Experimental Field A), in pounds per acre. | 28 |
| 4 | Yields of alfalfa seed at the University (Experimental Field A), in pounds per acre. | 29 |
| 5 | Analysis of variance for yields in Table 4. | 29 |
| 6 | Yields of alfalfa seed at the University (Experimental Field A), in pounds per acre. | 30 |
| 7 | Analysis of variance for yields in Table 6. | 30 |
| 8 | Yields of alfalfa seed at the University (Experimental Field B), in pounds per acre. | 31 |
| 9 | Analysis of variance for yields in Table 8. | 31 |
| 10 | Alfalfa seed yields at the University (Experimental Field C), in pounds per acre. | 32 |
| 11 | Average number of seeds per pod from hand-tripped alfalfa flowers at the University (Experimental Field B). | 33 |
| 12 | Analysis of variance for data in Table 11. | 33 |
| 13 | Average number of seeds per pod from hand-tripped alfalfa flowers at the University (Experimental Field C). | 34 |
| 14 | Analysis of variance for data in Table 13. | 34 |
| 15 | Average yields of alfalfa seed at South Junction, Man., in pounds per acre. | 44 |
| 16 | Yields of alfalfa seed in pounds per acre from plots receiving different treatments at South Junction. | 46 |

| <u>Number</u> | <u>Title</u> | <u>Page</u> |
|---------------|--|-------------|
| 17 | Analysis of variance for "no treatment" cross-strip at South Junction. | 47 |
| 18 | Analysis of variance for borax cross-strip at South Junction, Man. | 47 |
| 19 | Analysis of variance for man. sulphate cross-strip at South Junction, Man. | 48 |
| 20 | Yields of alfalfa seed on the cross-strips at South Junction, Man., in pounds per acre. | 49 |
| 21 | Analysis of variance for alfalfa seed yields of cross-strips at South Junction, Man. | 49 |
| 22 | Effect of sulphate application at South Junction, Man., upon the seed set of alfalfa pods and upon the germination and viability of the seeds (averages for data in Tables 23 & 24). | 50 |
| 23 | Effect of sulphate application upon the seed set of alfalfa pods at South Junction, Man. | 51 |
| 24 | Effect of sulphate application upon the germination and viability of alfalfa seed at South Junction, Man. | 52 |
| 25 | Effect of sulphur fertilizers upon the sulphur content of alfalfa plants (early bloom stage) at South Junction, Man. | 59 |
| 26 | Analysis of variance for effect of sulphur fertilizers upon sulphur content of alfalfa plants at South Junction, Man. | 59 |
| 27 | Effect of sulphur fertilizers upon the nitrogen content of alfalfa plants (early bloom stage) at South Junction, Man. | 60 |
| 28 | Analysis of variance for effect of sulphur fertilizers upon nitrogen content of alfalfa plants at South Junction, Man. | 60 |
| 29 | Effect of different soil treatments upon the sulphur content of alfalfa seed at South Junction; and a comparison with the sulphur content of seed from other areas. | 61 |
