

THE SYSTEM IRON-TIN

To Mr. A. I. Daybell
who patiently and helpfully
guided me in this, my first venture
into the study of research.

Gordon B. Skinner

A thesis presented to the Committee on
Graduate Studies, University of Manitoba,
in partial fulfillment of the requirements
for the degree of Master of Science.

August 1948

ACKNOWLEDGEMENTS

The author wishes to express his appreciation to the
various individuals and organizations who have assisted
him in the preparation of this report, and in particular
to those who have provided him with the facilities and
equipment necessary for the conduct of his research.

To several people who assisted in various stages of
the work, the author wishes to express his sincere appreciation.

To Mr. J. S. Peterson, Assistant Professor of Agricultural
Engineering, who did most of the work on the
cracker, without his skilled assistance, this useful piece of
equipment could never have been built.

To Dr. A. N. Campbell
who patiently and helpfully
guided me in this, my first venture
into the field of research.

To Mr. George Russell of the Department of Zoology, who assisted
the author in the method of polishing sections, and who took
the photomicrographs.

To Mr. V. Illingworth and other members of the University Building
staff, who assisted in obtaining a good deal of the material used
in the cracker.

To Mr. Robert Bird, University Technician, and his assistants,
Gordon Trider and Sam Turnbull, who gave valuable advice and
assistance in the construction and maintenance of the equipment
used.

ACKNOWLEDGEMENTS

The author wishes to express his appreciation to the Consolidated Mining and Smelting Company Limited, of Trail, B. C., for their generous Fellowship grant to the author, and for their extra grant for the purchase of special equipment.

To several people who assisted in various phases of the work, the author wishes to express his sincerest appreciation:

To Mr. J. J. Paterson, Assistant Professor of Agricultural Engineering, who did most of the work in building the ammonia cracker. Without his skilled assistance, this useful piece of equipment could never have been built.

To Mr. George Russell of the Department of Geology, who instructed the author in the method of polishing sections, and who took the photomicrographs.

To Mr. J. Illingworth and other members of the University building staff, who assisted in obtaining a good deal of the material used in the cracker.

To Mr. Robert Bird, University Technician, and his assistants, Gordon Trider and Cam Turnbull, who gave valuable advice and assistance in the construction and maintenance of the equipment used.
