1. Relationship of weather and grasshopper abundance

IV • WEATHER

III • GENERAL METHODS OF STUDY

5. ANIMAL LIFE
(1) MAMMALS
(2) BIRDS
(3) INSECTS

Plate VIII • Crop plan 1937
Plate VII • Crop plan 1936

(c) Cultivated crops grown
(AI) Plant succession on late land
(A) Southwest quarter of section 32
(AV) Southwest quarter of section 29
(III) Southwest section 29
(II) North half of section 29
(I) Southwest quarter of section 29
(d) Rotation on the study area

Rotation No. 16
Rotation 6 • A small clover on
(III) Lowland grass type
by sweet clover • Rotation No. 6
Rotation 5 • A roadside dominated

Rotation No. 4
Rotation 4 • Recovery to lowland
community on rotation No. 14
Rotation 3 • A ridge-rotation
community on rotation No. 16
Rotation 2 • A ridge-rotation

(II) Intermediate grassland types
(I) Highland grassland type
with key to location of rotations
and top species on the rotations
Table 1 • The relative abundance of grass

(a) Results of plant survey
communities
(2) Classification of the study area and
County plain

(1) Classification of the north Great
4. Vegetation and cultivated crops
