

THE MANNICH REACTION ON  
2,7-DIHYDROXYNAPHTHALENE

PART I

The Attempted Preparation of 1,8-Dimethylnaphthalene  
by the Mannich Reaction

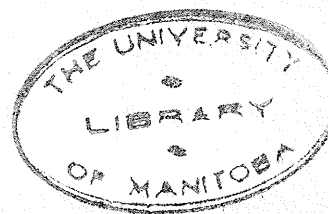

PART II

The Preparation and Characterization of Tetrahydrofurfural  
and Tetrahydrofuroic Acid

PART III

The Preparation of Some Unsaturated Malonic Esters and  
Barbiturates

by  
Douglas G. Hay

A thesis presented to the Faculty of Graduate Studies  
and Research of the University of Manitoba in partial  
fulfillment of the requirements of the degree of Master  
of Science.

1952

### ACKNOWLEDGEMENT

The author wishes to express his sincere thanks to those who have been of assistance to him in the carrying out of the research reported in this thesis. These include:

DR. E. H. CHARLESWORTH of the Department of Chemistry, whose guidance, encouragement and helpful advice have made the author's venture into research a pleasant and stirring experience,

THE NATIONAL RESEARCH COUNCIL, which has generously given the author a summer grant, without which financial assistance this research work could not have been completed,

THE RESEARCH COMMITTEE of the University of Manitoba, which has supplied both the apparatus and the chemicals for this investigation.
