Hi:

As per our discussion, please find attached requirements re<sup>n</sup> fish samples.  
Please verify receipt of this email.

Cheers  
Terry

## **PARASITES OF FISH OF THE RED RIVER DELTA**

**All fish samples will be collected by a designated contractor, placed in separate bags and each bag labeled as follows: fish species, fish number (listed consecutively, 1 to 300), gear used to collect the fish, location sample collected from (lat and long) and date collected. These fish will be delivered to the lab of T.A. Dick on ice (require notification when each lot of fish will be delivered – date and time). Fish will be examined and fish in poor shape (gills and guts decomposing or rotten) will be rejected. Please note that samples for each species should be across a size range from 0+ to mature adults and proportional i e. not all adult fish.**

**Please have contractor contact me as soon as you have all the sampling details worked out.**
