

AN INTENSIVE STUDY OF THE GRASSHOPPERS OF ECONOMIC
IMPORTANCE AT ARNAUD, MANITOBA, 1935.

BY

H. W. MOORE, B.Sc. (Man. 1934)

ZOOLOGY DEPARTMENT, UNIVERSITY OF MANITOBA.

A THESIS PRESENTED TO THE
COMMITTEE OF POST GRADUATE STUDIES OF THE UNIVERSITY OF
MANITOBA, IN CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE,
APRIL, 1936.

The data presented in this paper were accumulated while employed by the Entomological Branch, Department of Agriculture, during the summer of 1935 and have been officially released for thesis purposes.

CONTENTS

Page

I. INTRODUCTION.

1. Review of the development of the conception of intensive study centers.

2. Review of the work done on study centers.

3. Objects of the study.

4. Advantages of the Arnaud area for the study.

II. GENERAL DESCRIPTION OF THE ARNAUD AREA.

1. Geology.

Plate I. Soil associations of the Red River River Valley Soil Combination.

2. Soils.

Plate II. Soil associations of the Arnaud area.

3. Topography.

Plate III. View of the Arnaud area looking south west.

Plate IV. View of the area looking west.

Plate V. Panoramic view of the area looking east.

4. Plant communities and cultivated crops.

(1) Plant communities and cultivated crops.

Plate VI. View of the cultivated crops east of town.

Plate VII. View of the cultivated crops west of town.

(2) View of native plants.

(3) Grasshoppers and predators present.

III. WEATHER.

1. The relationship of weather to grasshopper abundance.

2. Meteorological observations made at Arnaud.

3. Summary of the meteorological data collected.

Plate VIII. Graph of weekly mean temperature and humidity.

Plate IX. Graph of the monthly data for deaths.
Plate X. Daily mean temperature, average winter
and average summer precipitation.

IV. METHODS.

1. Establishment of the area.
2. Estimation of the immediate population.
3. Field observations.
4. Methods of mortality due to disease.
5. Methods of egg survey.

A. DETAILED STUDY PLOTS.

1. Treatment of the detailed study plots.
- Plate XI. Map of the location of the detailed study plots.
- Plate XII. Photograph of part of the general observation area A.
- Plate XIII. View of part of Study Plot I.
- Plate XIV. View of portion of Study Plot II.
- Plate XV. Photograph showing portion of treated land on Study Plot III.
- Plate XVI. View of part of Plot IV.
- Plate XVII. Photograph showing old buildings on Plot A.
- Plate XVIII. View of part of Plot A.
- Plate XIX. View of part of Plot A.
- Plate XX. View of portion of Plot VII.
- Plate XXI. View of portion of Plot VII.
- Plate XXII. View of portion of Plot VIII.

2. Detailed study plot I. The most productive area of Sec. 34, T. 3, N. 36.

- (1) Reasons for selection.
- (2) General description.
- (3) Vegetation.
- (4) Grasshoppers.

Plate XXIII. Map of vegetation, crops and egg survey.

- (5) Disease.
- (6) Egg survey.
- (7) Association and eggs where eggs are found.
- (8) Predators.
- (9) Observations.
- (10) Conclusions and summary.
